FRESHNESS

Granular ice is an asset in many sectors, thanks to its multiple uses: from food conservation and display, to cocktails preparation, to applications in SPAs, in the world of cosmetics, in medical and hospital environments. This type of very wet ice is particularly appreciated also in the bakery sector.

Granular ice is very easy to handle, stock and weigh. Its peculiarity is the high residual-water content that, depending on model, may vary from 25% to 15%.

ICEMAKERS - SERIES

BERRIES

New range of granular icemakers, with capacity up to 1.000 Kg/day. Granular ice is generated by a vertical cylindrical evaporator, with a screw-conveyor, that scrapes the internal surface of the ice pulling it to the outlet of the machine, where ice-crunching system is located.

This system guarantees even ice quality and a minimal residual water.

The Berries line includes self-contained models and bin-combined versions, to be paired to the vast selection of Icematic bins.

ICEMAKERS - SERIES

BERRIES

The new machines of the Berries line are also available in ecological version R290, utilizing propane gas, 100% natural with zero environmental impact: the state-of-the-art technology to safeguard the environment at best.

Berries-F line, completely electronic, is available with R 134a - R452a gas.
