Specific weight 1 g,
approximately 8%
water content

GRAPE

COMPACTNESS

Nuggets-shaped has the characteristics of being both compact and pleasant to chew, being half-way between granular ice and solid ice cubes.

It is the ideal ice for the creation of cocktails where crunched ice is needed as caipirinhas, mojitos or caipiroskas.

Nuggets format ice has a low water contain and may be used in many spaces as: cocktails-bars, disco-clubs, professional catering and restaurants, centralized kitchens and the medical sector as well.

GRAPE

The range of icemakers “nugget” type is based on two models, with different production capacities, to be combined with a separate bin.

The “nugget” type ice is created via a vertical and cylindrical evaporator, equipped with a screw-conveyor, that scrapes the internal surface of the ice pulling it to the outlet of the machine, where an extruder presses the ice into small cylinders.

These machines to be paired to the vast selection of Icematic bins.

- GREAT PRODUCTION CAPACITY
- STAINLESS STEEL BODY SHELL
- FRONT-FACING AIR INTAKE AND OUTLET
- EASY MANAGEMENT OF THE ICE
- ONLY 8% RESIDUAL WATER IN ICE
- COMPATIBILITY WITH ICEMATIC BINS

ICEMAKERS - SERIES
