

## Boiling Pans

- water filled via two solenoid valves;
- water drained with 2" valve
- AISI 316 stainless steel container bottom
- no water in the interspace indicator light;
- safety thermostat to interrupt heating until restore of sufficient water level;

### Gas models

- 2 AISI 304 steel burners on bottom of container or interspace

### Electric models

- 3 steel heating elements outside the container bottom, or 2 armoured heating element units inside the interspace.

Indirect heating with low-pressure steam generated by the water in the jacket: safe and easy operation thanks to pressure gauge, safety valve and compensating valve.

Stainless-steel pan with AISI316 bottom.

May be filled with either hot or cold water.
