

# SERIE 900

**Code** CR0785809 **Model** 90PF/G150

## GAS BOILING PAN - DIRECT HEATING - 150 LT

### General characteristics

The 900 BARON line is made in compliance with strict European Standards in terms of safety, hygiene, reliability and respect for the environmental and is certified under international standards such as CE, GOST, AGA and others. Stainless steel with scotch-brite finish heightens the aesthetic appeal, and the technological and ergonomic innovation of this equipment. Thanks to great compositional flexibility,

cook tops can be matched with oven bases and accessorised with hygienic finishes. Customised line-ups are possible by combining and fixing the equipment back to back, flushed sideways with perfectly sealed connections, or by creating "bridge" structures, offering top solutions to any chef. Basic range features:

- 2 mm thick moulded tops;
- 2" height adjustable stainless steel feet;
- removable control panel for access, moulded and shaped to avoid withholding dirt;
- recessed, tilted and ergonomic knobs.

### BOILING PANS

Choosing a direct or indirect boiling pan depends on the desired cooking methods: direct heating pots are more suitable for boiling water and broths, whereas the indirect pots are recommended for cooking denser and jelly-type foods.

### Technical/functional characteristics

- Water filled via two solenoid valves;
- Water drained with 2" valve
- AISI 316 stainless steel container bottom
- No water in the interspace indicator light;
- Safety thermostat to interrupt heating until restore of sufficient water level;
- 2 AISI 304 steel burners on bottom of container or interspace
